

## Dedicated Server Solutions

A Dedicated Server Solution provides a more secure and robust platform for your online business.

Easynet Connect's Dedicated Server Solution ensures that a company who already has a web presence which is critical to their business operation is guaranteed secure hosting on a single server, with individual levels of connectivity and uptime to operate at maximum efficiency.

Collaborating with a hosting specialist like Easynet Connect enables not only a cost-effective and scalable solution, but a bespoke level of service, suitable for your individual business needs.

## Key features

**24/7 Security and Access:** To ensure an integrated high level of security of the datacentre, CCTV cameras and door alarms are in operation 24/7 inside and outside the building. Security staff are present 24/7 on all our sites.

**Range of Power:** To satisfy all our customer's requirements Easynet Connect datacentres can offer rack power up to 16amps AC (Alternating Current) or 40amps DC (Direct Current).

**Remote Hands:** Our hosting team will take care of the equipment 24x7, to protect your data and maximise network and hardware performances.

**Power Cooling system:** To maintain the optimum hosting performance for customer equipment, all environments are equipped with an energy efficient, liquid-cooled air chilling/condition system.

**Eco-Friendly Fire Detection and Suppression:** A double knock zone fire alarm/detector system is in place, which is complemented by FM200®. This enables Easynet Connect to detect and suppress a fire before it takes hold and causes any damage to the infrastructure, equipment and systems.

**Resilient Power:** To provide an Uninterruptible Power Service (UPS), back-up generators are in place. For up to 15 minutes the power will be provided by the UPS by which time the diesel generators will be powered up and brought on-line.

## Product benefits

**Experienced service provider:** A market leading service provider, Easynet Connect has been offering state-of-the-art hosting environments for its customer's equipment since 2001.

**Unique IP Address:** Have a dedicated IP address which points only to your website or web application.

**100Mbps Dedicated Network:** More security and relay guaranteed, thanks to the dual feed connection we provide for each server.

**Peace of mind:** By creating a secure hosting environment for the customer's data, Easynet Connect allows the customer to completely focus on their business.

**Reliability:** By assuring an uninterruptible power supply, Easynet Connect guarantee 100% stability to the customer.

**Scalable environment:** Easynet Connect can satisfy future requests for more space, thanks to the flexibility of its datacentres.

## Pricing

We offer easy to understand, dedicated pricing with no hidden costs, as the rental price is based on the customer's specific requirements.

An initial installation charge includes the configuration and installation of the equipment on site.

Back-up is available for an extra charge, and is not included in the annual or quarterly fee.

The minimum contract term for our Dedicated Server Solution is 12 months. Annual rental costs will vary depending on your chosen option.

## Service coverage

Easynet owns one of the most extensive fibre optic networks in the UK at 6,030km with 76 Points of Presence (PoPs), a number of which also offer Colocation facilities.

Easynet's network encompasses the UK, France, Germany, Belgium, Holland and Spain. Each Easynet operation has its own network centres, Hosting and Colocation facilities, national peering arrangements and international connectivity.

## Why Easynet Connect

An innovative low cost solution is always appealing but supplier confidence is key. Easynet was established in 1994 and has been part of the BSKyB Group since early 2006.

With over 1,200 unbundled network exchanges in the UK and 6,030Km of fibre, the Easynet Connect Network has access to over 70% of UK Homes and Businesses, making it the second largest in the UK.

Easynet has a proven track record of innovation in the UK market. Easynet was the first provider in the UK to provide DSL services over an unbundled local loop and has pioneered managed LLU services for business.

### At a glance

- Over a decade of heritage in the UK Business market
