

Colocation

Easynet Connect provides a market leading Colocation service for the secure housing and connectivity of customer equipment.

Colocation is ideal for businesses that want to keep control of their web services, but require more space, bandwidth and security than other dedicated hosting services can offer.

Easynet Connect provides a large choice of different locations to suit the business needs of companies across the UK, this includes:

- London – Brick Lane, established in 2001
- Major Network Point of Presence (PoP) locations across the UK
- Milton Keynes – launching in 2008

Colocation

Key features

24/7 Security and Access. To ensure an integrated high level of security of the datacentre, CCTV cameras and door alarms are in operation 24/7 inside and outside the building. Security staff are present 24/7 on all our sites.

Range of Power. To satisfy all our customers' requirements, Easynet Connect datacentres can offer rack power up to 16amps AC (Alternative Current) or 40amps DC (Direct Current).

Remote Hands. A remotely based on-site service is provided at some locations to support customers in managing their equipment without the necessity of being on-site.

Power Cooling System. To maintain optimum hosting performance for customer equipment, all environments are equipped with an energy efficient, liquid-cooled air chilling/conditioning system.

Eco-Friendly Fire Detention and Suppression. A double knock zone fire alarm/detector system is in place, which is complemented by FM200®. This enables Easynet Connect to detect and suppress a fire before it takes hold and causes any damage to the infrastructure, equipment or systems.

Resilient Power. To provide an uninterruptible power service back-up, generators are in place. For up to 15 minutes the power will be provided by the UPS (Uninterruptible Power Supply), by which time the diesel generators will be powered up and brought on-line.

Rack Size. All the racks offered by Easynet Connect are standard lockable 47u capacity, capable of hosting servers with dimensions of up to 800mm x 1200mm.

Cage. To suit customers looking for more space and security, Easynet Connect can provide a custom designed solution that meets the customers' requirements.

Product benefits

Experienced service provider. A market leading service provider, Easynet Connect has been offering a state-of-the-art hosting environment for its customers' equipment since 2001.

Optimisation of performance. By providing a state-of-the-art hosting environment and a choice of Direct Current power (DC), Easynet Connect guarantees optimum performance of the customers' equipment, which cannot be provided in an office location by customers themselves.

Peace of mind. By creating a secure hosting environment for customers' equipment and data, Easynet Connect allows the customer to completely focus on their business.

Reliability. By ensuring an uninterruptible power supply, Easynet Connect guarantees 100% stability to the customer.

Scalable environment. Easynet Connect can satisfy future requests for more space thanks to the flexibility of its datacentres, allowing the customer to save on the cost of moving equipment.

Colocation

Pricing

Colocation pricing is simple to understand with no hidden costs. The primary price is based on the datacentre location chosen by the customer, together with the size of the rack and the bandwidth connection.

There is an initial installation charge which includes support on-site for equipment delivery and installation.

Remote Hands and back-up are available for an extra charge and are not included in the annual or quarterly fee.

The minimum contract term for Colocation is 12 months.

Annual rental will vary by your chosen option.

Service coverage

Easynet owns one of the most extensive fibre optic networks in the UK at 6,030km with 76 Points of Presence (PoPs), a number of which also offer Colocation facilities.

Easynet's network encompasses the UK, France, Germany, Belgium, Holland and Spain. Each Easynet operation has its own network centres, hosting and Colocation facilities, national peering arrangements and international connectivity.

Why Easynet Connect

An innovative low cost solution is always appealing but supplier confidence is key. Easynet was established in 1994 and has been part of the BSkyB Group since early 2006.

With over 1,200 unbundled network exchanges in the UK and 6,030Km of fibre the Easynet Connect Network has access to over 70% of UK Homes and Businesses, making it the second largest in the UK.

Easynet has a proven track record of innovation in the UK market. Easynet was the first provider in the UK to provide DSL services over an unbundled local loop and has pioneered managed LLU services for business.

We provide a marketing leading Colocation service for the secure 24/7 housing and connectivity of customer equipment.

At a glance

- Over a decade of heritage in the UK Business market
- 2nd largest UK network
- 70% UK Home & Business coverage
- 6,030Km of fibre
- Largest UK SDSL footprint
- Track record in innovation
